## OUR SERVICES INCLUDE:

- Commercial Grade Sealcoating
- Hot Rubber Crack Repairs
- Cold Patch Pothole Repairs
- Power Washing
- Sandblasting
- Free Estimates

**Commercial Grade Asphalt Sealcoating** helps to eliminate the intrusion of Water, the harmful effects of UV Rays from Sunlight, damage from Chemical and Petroleum spills. Our product SEALS in and helps prevent the evaporation of the liquid asphalt that is binding the pavement together. This helps to prevent the pavement from shrinking, drying out (the light grey color), becoming brittle, losing aggregate and cracking. Sealcoating also helps to hold in the finer aggregate so the surface stays smooth. **We've been protecting our client's investments since 2006.**
